This collection of information is required by 37 CFR 1.53(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

150272

WE CLAIM:

1. A system of redundant pair automatic protection switching at the edge of a VPLS network comprising:

a redundant pair of provider edge nodes comprising:

a first provider edge node adapted to function as a working node of the redundant pair; and

a second provider edge node adapted to function as a protection node of the redundant pair;

wherein the first provider edge node is adapted to upon a switchover in the redundant pair:

send an explicit request to a third provider edge node which possesses a MAC address entry that the third provider edge node previously learned from the first provider edge node to flush said MAC address entry.

2. A system of redundant pair automatic protection switching at the edge of a VPLS network according to claim 1 wherein the redundant pair of provider edge nodes are configured to be an APS 1+1 redundant pair.

3. A system of redundant pair automatic protection switching at the edge of a VPLS network according to claim 1 further comprising:

an access switch linked to the first provider edge node over a working link and linked to the second provider edge node over a protection link;

wherein the access switch forms a working circuit with the working link and the first provider edge node, and wherein the access switch forms a protection circuit with the protection link and the second provider edge node.

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir: In response to the Office Action mailed November 26, 2008, Applicant respectfully submits the following amendments for form, and requests reconsideration and withdrawal of all rejections, for the reasons Applicant respectfully submits at the Remarks section of this paper.

Listing of the claims begins at page **2** of this paper.

Remarks begin at page **7** of this paper.

Application No: 11/443,101

Attorney's Docket No: ALC 3242.01

Listing of the Claims:

The following is a complete listing of all the claims in the application, with an indication of the status of each:

1 1. (Original) A system of redundant pair automatic protection switching at the
2 edge of a VPLS network comprising:

3 a redundant pair of provider edge nodes comprising:

4 a first provider edge node adapted to function as a working node of the
5 redundant pair; and

6 a second provider edge node adapted to function as a protection node of
7 the redundant pair;

8 wherein the first provider edge node is adapted to upon a switchover in
9 the redundant pair:

10 send an explicit request to a third provider edge node which

11 possesses a MAC address entry that the third provider edge node

12 previously learned from the first provider edge node to flush said MAC

13 address entry.

1 2. (Original) A system of redundant pair automatic protection switching at

2 the edge of a VPLS network according to claim 1 wherein the redundant

Sir: In response to the Office Action mailed April 1, 2009, Applicant respectfully submits the following amendments for form, and requests reconsideration and withdrawal of the Office Action rejections for the reasons Applicant respectfully submits at the Remarks section of this paper.

Listing of the claims begins at page 2 of this paper.

Remarks begin at page 8 of this paper.

Application No: 11/443,101

Attorney's Docket No: ALC 3242.01

Listing of the Claims:

The following is a complete listing of all the claims in the application, with an indication of the status of each:

- 1 1. (Currently Amended) A system of redundant pair automatic protection
- 2 switching at the edge of a Virtual Private LAN System (VPLS) network
- 3 comprising:
- 4 a redundant pair of provider edge nodes comprising:
- 5 a first provider edge node adapted to function as a working node
- 6 of the redundant pair, [[;]] and
- 7 a second provider edge node adapted to function as a protection
- 8 node of the redundant pair; and
- 9 a third provider edge node possessing a media access control (MAC)
- 10 address entry for the first provider edge node, previously learned by the third
- 11 provider edge node,
- 12 wherein the first provider edge node, when functioning as the working
- 13 node, communicates with the third provider edge node, and
- 14 wherein the first provider edge node is adapted to upon a switchover in
- 15 the redundant pair:
- 16 send an explicit request to the [[a]] third provider edge node ~~which~~
- 17 ~~possesses a MAC address entry that the third provider edge node~~

Application No: 11/443,101

Attorney's Docket No: ALC 3242.01

18 ~~previously learned from the first provider edge node~~ to flush said MAC
19 address entry.

1 2. (Currently Amended) A system of redundant pair automatic protection
2 switching at the edge of a VPLS network according to claim 1 wherein the
3 redundant pair of provider edge nodes are configured to be an Automatic
4 Protection Switching (APS) 1+1 redundant pair.

1 3. (Original) A system of redundant pair automatic protection switching at the
2 edge of a VPLS network according to claim 1 further comprising:
3 an access switch linked to the first provider edge node over a working
4 link and linked to the second provider edge node over a protection link;
5 wherein the access switch forms a working circuit with the working
6 link and the first provider edge node, and wherein the access switch forms
7 a protection circuit with the protection link and the second provider edge
8 node.

1 4. (Original) A system of redundant pair automatic protection switching at the
2 edge of a VPLS network according to claim 1 further comprising:
3 a first tunnel linking the first provider edge node with the third
4 provider edge node;

Application No: 11/443,101

Attorney's Docket No: ALC 3242.01

Applicant further submits that the claims as amended define all acronyms and abbreviations, and therefore overcome the objections to claims 1, 2 and stated at page 2 of the Office Action.

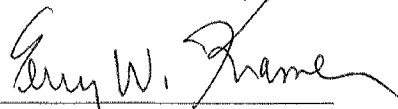

Applicant respectfully requests the Examiner, for at least the reasons that Applicant submits above, to reconsider and withdraw the rejection of claims 1 and 6, and of all their dependent claims 2-5 and 7-8.

CONCLUSION

Applicant submits that all pending claims of this application stand in condition for allowance. Should the Examiner have any further comments or suggestions, though, Applicant respectfully requests that the Examiner telephone the undersigned attorney to expeditiously resolve any outstanding issues.

In the event the fees submitted prove insufficient in connection with the filing of this paper, please charge our Deposit Account Number 50-0578 and please credit any excess fees to such Deposit Account.

CLAIM AMENDMENTS

This listing of claims, with an indication of the status of each claim, will replace all prior versions and listings of claims in the application.

Listing of Claims

- 1 1. (Currently Amended) A system of redundant pair automatic protection
2 switching at the edge of a Virtual Private LAN System (VPLS) network
3 comprising:
 - 4 a redundant pair of provider edge nodes comprising:
 - 5 a first provider edge node ~~adapted to function as~~ that is a working
6 node of the redundant pair before a switchover and a protection node of
7 the redundant pair after the switchover, and
 - 8 a second provider edge node ~~adapted to function as a~~ that is the
9 protection node of the redundant pair before the switchover and the
10 working node of the redundant pair after the switchover; and
 - 11 a third provider edge node possessing a media access control (MAC)
12 address entry for the first provider edge node, previously learned by the third
13 provider edge node,
 - 14 wherein the first provider edge node, when functioning as the working
15 node, communicates with the third provider edge node, and

Application No: 11/443,101
 Attorney Docket No: ALC 3242.01

16 wherein the first provider edge node₁ ~~is adapted to upon a~~ after the
 17 switchover in the redundant pair₁ ~~send~~ sends an explicit request to the third
 18 provider edge node to flush said MAC address entry.

1 2. (Currently Amended) A ~~The~~ system of ~~redundant pair automatic~~
 2 ~~protection switching at the edge of a VPLS network according to claim 1,~~
 3 wherein the redundant pair of provider edge nodes ~~are configured to be~~ is
 4 an Automatic Protection Switching (APS) 1+1 redundant pair.

1 3. (Currently Amended) A ~~The~~ system of ~~redundant pair automatic protection~~
 2 ~~switching at the edge of a VPLS network according to claim 1,~~ further
 3 comprising:

4 an access switch linked to the first provider edge node over a working
 5 link and linked to the second provider edge node over a protection link;
 6 wherein the access switch forms a working circuit with the working link and
 7 the first provider edge node, and wherein the access switch forms a protection
 8 circuit with the protection link and the second provider edge node.

1 4. (Currently Amended) A ~~The~~ system of ~~redundant pair automatic protection~~
 2 ~~switching at the edge of a VPLS network according to claim 1,~~ further
 3 comprising:

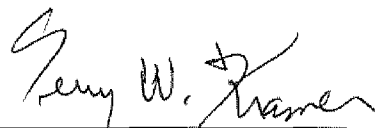

Application No: 11/443,101
Attorney Docket No: ALC 3242.01

CONCLUSION

Applicant submits that all pending claims of this application stand in condition for allowance. Should the Examiner have any further comments or suggestions, though, Applicant respectfully requests that the Examiner telephone the undersigned attorney to expeditiously resolve any outstanding issues.

AMENDMENT UNDER 37 C.F.R. § 1.111

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In response to the Office Action mailed April 9, 2012, Applicant respectfully submits the following amendments for form, and requests reconsideration and withdrawal of the Office Action rejections for the reasons Applicant respectfully submits in the Remarks section of this paper.

CLAIM AMENDMENTS begin on page 2 of this paper.

REMARKS begin on page 9 of this paper.

Application No: 11/443,101
Attorney Docket No: ALC 3242.01

CLAIM AMENDMENTS

This listing of claims, with an indication of the status of each claim, will replace all prior versions and listings of claims in the application.

1. (Previously Presented) A system of redundant pair automatic protection switching at the edge of a Virtual Private LAN System (VPLS) network comprising a redundant pair of provider edge nodes comprising:

a first provider edge node that is a working node of the redundant pair before a switchover and a protection node of the redundant pair after the switchover, and

a second provider edge node that is the protection node of the redundant pair before the switchover and the working node of the redundant pair after the switchover; and

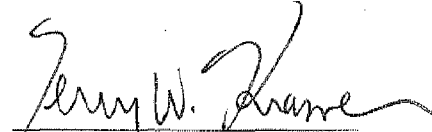

a third provider edge node possessing a media access control (MAC) address entry for the first provider edge node; previously learned by the third provider edge node, wherein the first provider edge node, when functioning as the working node, communicates with the third provider edge node, and, after the switchover in the redundant pair, sends an explicit request to the third provider edge node to flush said MAC address entry for the first provider edge node.

Application No: 11/443,101
Attorney Docket No: ALC 3242.01

CONCLUSION

Applicant submits that all pending claims of this application stand in condition for allowance. Should the Examiner have any further comments or suggestions, though, Applicant respectfully requests that the Examiner telephone the undersigned attorney to expeditiously resolve any outstanding issues. In the event the fees submitted prove insufficient in connection with the filing of this paper, please charge our Deposit Account Number 50-0578 and please credit any excess fees to such Deposit Account.

Respectfully submitted,
KRAMER & AMADO, P.C.
